

WHAT'S HAPPENING AT 785 AESTHETIC MED SPA

WHAT IS BIO-IDENTICAL HORMONE THERAPY?

Bioidentical Hormone Replacement Therapy (BHRT) is a method of restoring the balance of your hormones and aiming to relieve these symptoms, using compounded hormones that are identical in structure to those your body naturally produces. That way, your body recognizes and uses these replacement hormones in exactly the same way it would hormones it produces naturally.

Hormone Pellet Therapy

As we age, our bodies naturally start to reduce the amount of hormones like testosterone and estrogen they produce. Hormones such as these are incredibly important to how many areas of your body function – such as your brain, heart, bones, reproductive organs, and more. When these hormones are out of balance, people can experience a number of different symptoms.

The Biote Method

The Biote Method of hormone optimization is the result of condensing over 80 years of scientific research into a program that may help with the earliest signs of aging. • The Biote Method uses pellets, which are about the size of a grain of rice, for hormone optimization. Your Salina provider at 785 Aesthetic Med Spa inserts these tiny pellets under the skin during a simple, in-office procedure. • The pellets will then dissolve slowly over time – they only need to be re-administered approximately every 3-5 months, depending on the patient. • As the pellets dissolve, they release a steady stream of hormones into your bloodstream, which your body will then use as it needs. Over time, the pellets will be completely absorbed, leaving nothing behind.

Provider Spotlight!

Tamara grew up in the Salina area and graduated from Salina Central High School. Throughout her career, she has worked in a variety of industries but found her calling in aesthetic arts. Since earning her esthetician license 10 years ago, Tamara has gained extensive industry knowledge and experience. She is familiar with a wide array of treatments, products, and procedures designed to treat skin conditions from acne, aging, and keratosis polaris to dermatillomania and rosacea.

Tamara is thrilled to be back in her hometown and brings energy, enthusiasm, and passion to her role at 785 Aesthetic Med Spa. She takes her work very seriously and is proud to contribute to her client's sense of restored confidence in their beauty and wellness journey. With her advanced skin care services, some patients may even mistake her skill for magic!

Product of the Month

H.A. Intensifier is a multi-beneficial corrective serum proven to amplify skin's hyaluronic acid levels. This unique formulation contains a high concentration of pure hyaluronic acid, proxylane™, and botanical extracts of licorice root and purple rice to support skin's hyaluronic acid levels and deliver surface hydration, helping improve the visible appearance of firmness, smoothness, and facial plumpness. This hyaluronic acid serum may be used as part of a home skincare regimen after dermal fillers; always consult with your physician for individual at-home advice.

BENEFITS:

- Amplifies skin's hyaluronic acid levels by 30%
- Reduces the look of crow's feet, nasolabial folds (parenthesis around the mouth or laugh lines), and marionette lines (lines from the corners of the mouth down to chin) for smoother, firmer skin
- Delivers long lasting hydration to visibly improve skin's texture
- Unique serum-gel texture format creates a smooth canvas on skin
- Paraben- and dye-free, ideal for all skin types
- Can be used as home care after dermal fillers; always consult with a physician for individual regimen recommendations
- TSA Approved

SKIN TYPES: Dry, Normal, Oily, Combination, Sensitive

SKIN CONCERN: Dehydrated, Aging
