Is Thinning or Receding Hair Messing With Your Head?

A full head of luxurious, soft hair is very much associated with youth, beauty, and vitality, so when thinning hair becomes noticeable, it leaves insecurities in place of our stolen confidence. But patients don't have to live with thinning or receding hair any longer. PRP, or Platelet-Rich Plasma, stimulates hair growth and slows hair loss for an effective method of fighting this creeping sign of aging.

785 Aesthetic Med Spa's superior customer service, relaxing atmosphere, and state-of-the-art technology make us the natural choice in elite hair restoration or PRP plumping treatments in the Kansas area.

September Special for Med Spa Members!

1 VI Peel + Dermaplane Same Day

Product of the Month

A hydrating facial mist that is clinically proven to strengthen the skin's barrier and immediately reduce visible redness. A botanical blend of cucumber, thyme, olive leaf, and rosemary extracts soothes and calms the skin, while a 6.2% blend of hyaluronic acid and glycerin helps draw and retain water in the skin. This friction-free facial mist is easy to layer, complements every regimen, and can be reapplied throughout the day, even over makeup, for all-day hydration.

BENEFITS:

- Immediately reduces visible redness by 31%
- Delivers immediate and all-day hydration
- Soothes and hydrates sensitive skin
- Clinically proven to reduce visible redness post-laser
- Hygienic, touchless format
- Paraben-, alcohol-, gluten-, and silicone-free
- TSA Approved

SKIN TYPES: Dry, Normal, Oily,
Combination, Sensitive

SKIN CONCERN: Dehydrated, Sensitized
Skin, Acne-prone, Aging skin
