REALISTIC EXPECTATIONS AND THE POWER OF COMBINATION TREATMENTS

Setting realistic expectations is crucial in esthetic treatments. While procedures like dermal fillers can yield beautiful results, they may require multiple sessions for the desired outcome. Combining

treatments, such as RHA dermal fillers with Botox or microneedling, can lead to natural long-lasting results. A tailored approach addresses various concerns simultaneously for balanced results. Remember, esthetic treatments are a journey, not a quick fix – trust the process to create a personalized plan for your natural beauty.

PRODUCT OF THE MONTH

SkinCeuticals Cell Cycle Catalysts

Cell Cycle Catalyst™ is a daily serum that enhances anti-aging effects, featuring a 7.7% multi-acid complex and 1% Taurine. Clinically proven to gently exfoliate and improve skin texture, it targets discoloration and visible lines while maintaining hydration for a healthy skin barrier. This serum serves as an ideal first step in any anti-aging routine and prepares skin for professional chemical peels.

November 22: Join us for Filler Friday Flash Sale, featuring a \$100 discount on Dermal Filler (gift certificates available)

RHA DERMAL FILLERS - WHAT ARE THEY AND WHY DO WE LOVE THEM?

RHA stands for Resilient Hyaluronic Acid. They are a unique category of dermal fillers designed to adapt to facial dynamics, giving a natural appearance even with facial movements.

Here are some key benefits:

1. **Dynamic Adaptability:** RHA Fillers are highly elastic and designed to move with facial expressions.
 2. **Natural-Looking Results:** Due to their flexibility, RHA fillers provide a more natural look, especially during facial movements, which can be challenging to achieve with traditional fillers.
 3. **Longevity** - RHA fillers are formulated to last longer than some traditional hyaluronic acid fillers, with results often lasting up to 15 months.
 4. **Hydrating Properties** - As a hyaluronic acid-based filler, RHA helps to attract and retain moisture, which can improve skin texture and hydration over time.
