WHAT IS CO2 LASER RESURFACING?

CO2 laser resurfacing is a powerful skin rejuvenation treatment that uses a carbon dioxide laser to remove the outer layers of damaged skin, promoting the growth of fresh, healthy skin. This procedure improves skin texture, tone, and elasticity while addressing various concerns. CO2 laser resurfacing is ideal for individuals seeking dramatic results with long-lasting benefits. Consult with one of our providers to determine if this treatment is right for you!

PROVIDER SPOTLIGHT

Savannah may be a newer face in Salina, but she's a true Kansas girl at heart! Born and raised in the Sunflower State, she began her nursing journey at Pratt Community College, earning her RN degree and dedicating over 20 years to caring for her community.

Today, Savannah brings her expertise and passion to 785 Aesthetic Med Spa and Oral Facial and Implant Surgery alongside Dr. Lucaci. With her warm approach and skilled hands, she's committed to helping clients feel amazing in their own skin, delivering personalized care that restores both beauty and confidence.

When she's not creating smiles at work, Savannah can be found diving into a good book, exploring Salina's scenic trails, or making memories with her family - including her husband, son, two daughters and grandson. She's proud to call Salina home and loves being part of such a vibrant community!

To schedule a consultation with Savannah, give us a call at 785-246-7125 or visit our website www.785medspa.com to book online!
