UNLOCKING THE POWER OF DEXA SCAN: THE GOLD STANDARD IN BODY COMPOSITION ANALYSIS

The DEXA (Dual-Energy X-ray Absorptiometry) scan is a highly accurate tool for assessing body composition, offering insights beyond scale weight. It measures body fat percentage, muscle mass, and bone density, providing detailed information that traditional methods lack.

*Benefits of a DEXA Scan:

- Accurate body fat measurement and distribution
- Muscle mass analysis to track changes
- Bone density assessment for osteoporosis risk
- Personalized health insights for tailored fitness and nutrition

Who Should Get a DEXA Scan?

- Athletes aiming to improve performance
- Weight loss seekers tracking fat loss vs. muscle gain
- Health-conscious individuals monitoring well-being
- Post-menopausal women and seniors assessing bone health

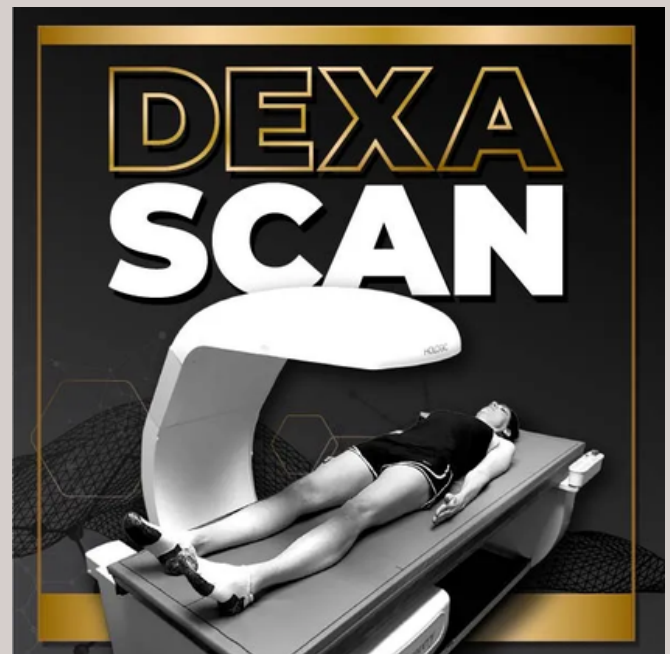

*What to Expect:

The scan is quick, painless, and non-invasive, taking about 10 minutes with no special preparation required.

Take control of your health by booking a DEXA scan today to inform your fitness goals and track progress confidently.

Price: \$99-\$150

TEAM MEMBER SPOTLIGHT

Staci, a Salina, Kansas native, discovered her passion for helping others early on. After earning her dental assistant certification from Salina Technical College, she built a career in healthcare and patient care. In 2015, she joined Dr. Lucaci's oral surgery practice, excelling as an office manager before advancing to practice manager and marketing director at 785 Aesthetic Med Spa. She now oversees operations, marketing, and patient care, helping individuals achieve their aesthetic goals.

A devoted mother of three + two bonus kids, Staci enjoys reading, traveling, and spending time with her family. Summers are often spent lakeside, embracing nature and relaxation.
